

KELLY CHEN

Plano, TX | 469-708-0299 | kellychenmeiyi@gmail.com | LinkedIn: [kellychen0921](#) | GitHub: [Kelly0921](#)

EDUCATION

Lehigh University, Bethlehem, PA

Graduation: May 2025

Bachelor of Science in Computer Science and Business (Honors)

Related Coursework: Java Programming and Data Structures, Foundation of Discrete Structures and Algorithms, Introduction to Data Science, Computer Organization and Architecture, Database Systems and Applications, Operating System Design, Intermediate Macroeconomic Analysis, Marketing Analytics and Artificial Intelligence in the Digital Space, Corporate Financial Policy

EXPERIENCE

Bloomberg | *Software Engineer (Fixed Income - Private Securities)*

July 2025 - Present

Oracle | *Software Engineer Intern*

Jan. 2024 - Dec. 2024

Central Bank Digital Currency (CBDC) Capstone Project

- Developed a CBDC platform using **Oracle Database Blockchain Tables**, **PL/SQL procedures**, and **REST APIs**, facilitating a scalable and efficient digital currency management system that meets regulatory compliance and enhances transaction processing
- Performed **benchmarking** and **performance testing** by creating diverse test profiles and stress tests, resulting in a 30% improvement in performance metrics following the implementation of sharding techniques

JPMorganChase | *Software Engineer Intern* | Jersey City, NJ

June 2024 - Aug. 2024

Customer Interaction Utility (CIU)

- Developed and implemented a **self-service onboarding tool** to automate the CIU onboarding event process, reducing risk and operational costs while accelerating time-to-market by cutting onboarding time from hours to mere minutes using **React**, **Spring Boot**, **Cassandra**, and **Kafka** technologies for frontend, backend integration, and data management
- Created a **data processing pipeline** that dynamically retrieves and validates topic metadata, leading to improved system performance and reliability through enhanced throughput and producer rate insights by utilizing **Apache Kafka** for real-time data ingestion and incorporating user-defined configurations to optimize the onboarding experience

Visa | *Software Engineer Intern* | Austin, TX

May 2023 - Aug. 2023

Visa Global Billing Platform

- Implemented an approval workflow **state machine** connected to **RESTful APIs** with visualization using **Spring Boot**, **Angular**, **MongoDB**, and **Swagger**, enabling users to track the status of uploaded billing line objects and standardized workflow
- Created a reusable **Spring Boot library** with an API for password encryption and decryption and facilitated code reuse across multiple team applications, enhancing efficiency and maintainability

LEADERSHIP & ACTIVITIES

Founder & President | *Girls Who Code (GWC) College Loop - Lehigh University*

Apr. 2024 - Present

- Led a team of 8 executive board members to grow the club to over 70 members in its first semester, organized fully funded trips for 12 students to conferences, hosted professional development workshops, and grew the club's LinkedIn page following to over 2,600, enhancing community engagement and providing women with exclusive opportunities in tech

Co-Founder | *SkanPay*

Dec. 2020 - Present

- Co-founded a payment gateway company that combines coupon redemption and payment using a multielement QR code to make payment and coupon redemption more efficient and convenient
- Filed a patent application for "Methods and Systems of Mobile Phone Payment with Coupon Redemption" (63/077,567) and conducted user research, competitive analysis, and business model development during a 6-week entrepreneurial program, applying design thinking principles to effectively address customer needs

NYC Summer Tech Hub Leader | *Rewriting the Code (RTC)*

May 2024 - Aug. 2024

- Spearheaded the planning and execution of 6+ tech community events for 10-30 participants each, successfully managing logistics and budget constraints to foster engagement and collaboration within the RTC community in NYC

SKILLS

Programming Languages: Java, C, C++, R, Python, Dart, HTML/CSS

Software: Kafka, Cassandra, MongoDB, Dokku, Docker, ElephantSQL, Node.js, JFrog Artifactory, Swagger, Jira, Confluence, Bitbucket, SAP, Tableau, VMware, Android Studio, WordPress, Git

Framework/Library: Spring Boot, Spring, Flutter

AWARDS

MLH's Top Hackers of 2025 | Major League Hacking

Sept. 2025

Top 100 Intern'24 | Yello and WayUp

Aug. 2024

Distinguished Fellow Leadership Award'24 | Harvard WECODE: Women Engineers Code Conference

Feb. 2024

Code for Good Hackathon'23 Winner | JPMorganChase

Sept. 2023

Professional Affiliations: Major League Hacking (MLH) Production Engineering Fellow with Meta, CodePath Tech Fellow, AnitaB.org, National Center for Women & Information Technology (NCWIT), Computer Science and Business Association (CSBA)

Additional Activities: Visa Campus Ambassador, LehighSiliconValley2024, Correlation One Data Science For All/Women
